Arnold, Martin, Fleming, Sam, & Claire Jones. 2024. "Can Europe's economy ever hope to rival the US again?." FT Montage/Getty Images. <https://www.ft.com/content/93f88255-787b-4c06-849c-f7722c83e8b6>.

This website will look at the levels of education and training within the European Union. It will measure different countries' levels of employment to see if there is a correlation between high levels of education and training and high levels of employment within a country.

Percentage of Young People with Formal and Non-Formal Education and Training

This [map](#) shows the percentage of young people with formal and non-formal education and training in 2022 in different European countries. The darker the color pink, the higher the percentage of the population that has formal and non-formal education and training. After looking at the map, we can see that Sweden and Finland have the highest percentages of people with formal and non-formal education and training. Eastern European countries, including Bulgaria and Bosnia-Herzegovina, have the lowest percentages of people with formal and non-formal education and training.
